

Ideation Phase Empathize & Discover

Date	19 September 2022
Team ID	PNT2022TMID30534
Project Name	Real-Time River Water Quality Monitoring And Control System
Maximum Marks	4 Marks

Empathy Map Canvas:

Empathy Mapping is a team process that helps you to identify the thoughts and feelings of a particular group. Empathy Mapping is a collaborative exercise, so get everyone involved in the same room. Have plenty of sticky notes and marker pens available, so that you can all get involved. In River water quality monitoring and control system, the causes and effects are considered. How the common man and farmer should be benefited by this system. And how should they suffer is explained. How should a common man be aware about the river basis. The pain and gain are described in the empathy map.

Example: Real-Time River Water Quality Monitoring And Controlling
